

T-REX: Premier z/OS Catalog Management Version 7 Release 1 – New Release Announcement

z/OS 2.1 Support

Full support for the IBM z/OS 2.1 Operating System and earlier z/OS 1.13-1.12-1.11 versions.

Major Enhancements

- Full support for the IBM z/OS 2.1 operating system.
- Full support for ICF Catalogs using Record Level Sharing (RLS).

Batch Enhancements

- INTEGRITYCHECK provides several new options providing enhanced functionality for OBJ(ALIAS) and OBJ(CATALOGSTRUCTURE) processing.
- REORG command supports the ability to change STARTED TASK names to meet installation standards.
- PRINT SMF supports selection by BCS name and JOB name.
- SYNCRONIZE has a new option to delete non-VSAM entries.
- TAPE RAPTOR has a new command, EXTRACT, which builds the Extract without the need to run an Audit first.

ISPF Panel Enhancements

- Option 4.1 Catalog View has RLS Quiesced and Enabled columns; also added same to I (Information) line command.
- Option 4.5 Catalog View also added a limited set of SMS commands to the menu.
- All dialogs that support the REPORT command option will save the output data set name for life of the session.
