

**Maximizing The Business Value-4IT  
Resources Within Your Organization**

## **Effective, Affordable & Intelligent Capacity Management Solution - 1 March 2015**

### **PerfTechPro zAnalytics Version 2 Release**

[Value-4IT](#) are pleased to announce a new version of [PerfTechPro zAnalytics](#), an IT capacity and performance management tool designed specifically for 21<sup>st</sup> Century data centres and cost-conscious IT management professionals, was introduced today. PerfTechPro is Windows-based software providing automated data collection, analysis, reporting and simulation modelling.

Starting with IBM's System z platform, PerfTechPro enables precise measurement and analysis of resource usage, giving IT management professionals the ability to measure and manage the efficiency and effectiveness of their enterprise servers. PerfTechPro Version 2 includes support of Client Server architecture providing a more efficient, network friendly solution.

[PerfTechPro](#) was introduced by company founders William Sheldon, PhD, and William Hart. Both are former IBM staffers with long-time experience in mainframe capacity and performance issues and solutions.

Introducing the new version, Hart said PerfTechPro's affordability and intuitive interface belie its sophistication. "PerfTechPro is designed to deliver sophisticated, affordable, easy-to-use solutions for IT management professionals looking for fast, insightful help without high-cost, complex and time-consuming licensing requirements."

Shelden noted that PerfTechPro is one of the few capacity management tools which offer simulation modelling of IBM System z mainframes, including support for the latest z13 server.

### **Summary**

For more information regarding the [PerfTechPro for z/OS](#) solution, please feel free to [Contact Us](#) for a no obligation discussion regarding your requirements. Thank you.
